SAHAYAK

Team Aasra · the caregiving network for India's elderly

THE PROBLEM

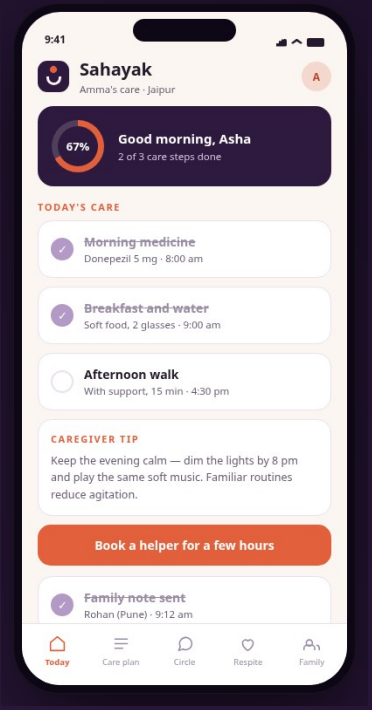

Elder care in India rests on one person in the family — and she is alone.

- 88 lakh Indians over 60 live with dementia
- Only one in ten gets any diagnosis or care
- Families give 10× more care than the health system

₹15,000–75,000

a month for urban home care today — or one exhausted caregiver, alone.

HOW SAHAYAK WORKS

1. **Guide** — A daily voice checklist in her own language.
2. **Circle** — Other families to ask, any time.
3. **Respite** — A verified helper, booked for a few hours.
4. **Family** — A short end-of-day note home.

THE MARKET — THE GAP IS THE MARKET

Indians aged 60 and above	**10.4 crore**
Living with dementia	**88 lakh**
Getting any care today	**~9 lakh**
Year-one target	**100**

Nine in ten families are reached by nobody today. That gap is our market.

BUSINESS MODEL — FOUR STREAMS

Family subscription	**₹199–499 / month**
Respite bookings	**15–20% of booking**
Hospital discharge pack	**Per patient**
Corporate elder benefit	**Per employee**

₹199 a month, against ₹15,000–75,000 for home care today.

OUR ASK

Back the pilot: 100 families across two cities by March 2027 — one hospital partner and your mentorship behind it.

Sahayak — har caregiver ke paas ek aasra.
